

# Stanislas Andujar

Platform engineer · DevOps · AI agent builder

Eight years building cloud platforms and CI/CD pipelines at scale. Now shipping AI agents to production — autonomous or leading a team.

Montpellier, France

Looking for. Open to platform · staff DevOps · AI infra roles — Remote · hybrid · EU. From May 2026.

## EXPERIENCE

### Technical Lead, Soulmates · Eliza Labs

02/2026 → now

Remote

*AI matchmaking on WhatsApp/SMS · no app, no forms — entire experience is a conversation with an LLM-driven agent.*

- End-to-end technical architecture, from product surface to infrastructure. Tech lead on a 3-person cross-functional team (product + 2 devs), 100+ PRs merged in six weeks.
- Owner of the GKE landing zone (Terraform) — VPC, CloudNativePG, NGINX Ingress, cert-manager, ExternalDNS, SigNoz observability, self-hosted GitHub runners, Artifact Registry — provisioned end to end.
- Application stack — Next.js admin dashboard (funnels, trajectories, matches, safety, conversations), Stripe API for the Connection Fund, WhatsApp Cloud gateway with voice-note STT/TTS via Vertex, containerized async workers (matching + notifications), Postgres schema + Drizzle ORM.

TypeScript · Next.js · React · GKE / Kubernetes · KEDA · Terraform · Helm · PostgreSQL · CloudNativePG · pgvector · Drizzle ORM · Redis · GitHub Actions · Stripe · WhatsApp Cloud API · Vertex AI

### Full-Stack Engineer, elizaOS Core · Eliza Labs

10/2025 → now

Remote · San Francisco

*elizaOS — leading open-source AI agent framework (18k+ stars). elizaOS Cloud — SaaS used by 10,000+ users.*

- Core contributor on elizaOS (18k+ ★) and elizaOS Cloud (10k+ users) — joined as unpaid OSS contributor in April 2025, hired full-time after a year of consistent shipping.
- Cloud platform architecture — unified messaging API, multi-tenant Postgres with Row-Level Security, Pepr-based Kubernetes operator that reconciles agents and KEDA ScaledObjects from a custom `Server` CRD — scale-to-zero AI workloads.
- Cloud infra migration from AWS to GCP — GKE Autopilot Terraform modules, Workload Identity Federation for GitHub Actions OIDC, Artifact Registry — no static secrets.

TypeScript · Node.js · GCP / GKE Autopilot · Kubernetes · Terraform · Helm · Pepr (operator) · PostgreSQL / RLS · CloudNativePG · Redis · GitHub Actions OIDC · Plugin architecture

### DevOps Engineer — Core Infrastructure · Bedrock Streaming

06/2024 → 10/2025

Lyon · hybrid · freelance

*European streaming platform — 20M+ regular viewers. Embedded in the core DevOps team that runs the entire Kubernetes infrastructure (1000+ nodes) for 50+ product teams shipping continuously.*

- Full Argo Rollouts integration — progressive canary strategies with automated rollback on business metrics (Apdex, error rate, success rate, custom KPIs).
- Serverless credential rotation system in Go — synced across AWS, Fastly and internal services.
- Hybrid EC2/ECS load testing platform — x10 capacity at 90% lower cost.

Go · AWS ECS / EKS · Argo Rollouts · ArgoCD · Fastly · Terraform · GitHub Actions

### DevOps Engineer · EDF

09/2023 → 06/2024

Lyon · permanent

*EDF — France's largest electricity producer. CI/CD platform serving multiple Java/Angular product teams.*

- Built a full CI/CD platform for multiple Java/Angular product teams.
- On-demand environment provisioning via Terraform + AWS Lambda.
- Quality gates with SonarQube, artifact management with Nexus.

GitLab CI · Terraform · AWS Lambda · SonarQube · Nexus · Grafana

## Tech Lead DevOps → Chaos Engineer · Klanik · Enedis mission

01/2022 → 09/2023

Lyon · permanent

*Enedis — France's number one electricity distribution network. Critical national infrastructure.*

- GitLab CI forge supporting 450 applications — 40+ modular templates, autoscaling runners, Vault, Nexus, automated DRP.
- Industrialized CI/CD across 450+ apps — reusable template library, automated security scans on every pipeline.
- Chaos engineering program — large-scale GameDays (100+ participants) simulating DDoS, database corruption, exposed secrets on resilient EKS clusters.

Kubernetes / EKS · GitLab CI · Vault · ArgoCD · Prometheus

---

## DevOps Consultant · Lizeo

01/2021 → 01/2022

Lyon

*Lizeo — automotive data company. Multi-project Kubernetes operations.*

- Multi-project Kubernetes operations across product teams.
- Prometheus / Grafana observability rollout.
- Internal training programs on Docker, GitLab CI and Terraform.

Kubernetes · Prometheus · Grafana · Docker · Terraform

---

## DevOps & Software Engineer — four successive roles · Worldline Global

09/2017 → 02/2021

Seclin · apprenticeship → permanent

*Three and a half years at Worldline across four successive roles — apprentice, software engineer, then DevOps engineer. Retail and payments products at scale.*

- Migrated critical apps to Kubernetes / OpenShift, built Prometheus / Zipkin / Grafana observability stack, automated deployments with Helm + GitLab CI.
- Backend Java / Spring Boot development with full containerization, SonarQube quality gates: doubled test coverage, zero rollback in 18 months.
- Designed and implemented a full CI/CD workflow for a major retail client (apprenticeship, autonomous within a 4-person team), onboarded the team on new tools.

Java · Spring Boot · MongoDB · Kubernetes / OpenShift · Helm · GitLab CI · SonarQube · Prometheus · Grafana · Zipkin

---

### HARD SKILLS

#### CLOUD

AWS · GCP/GKE · Kubernetes · KEDA · Argo  
Rollouts · ArgoCD · Terraform · Helm

#### CI/CD

GitHub Actions · GitLab CI · Dagger · Bun ·  
Playwright

#### BACKEND

TypeScript · Go · Node.js · PostgreSQL (RLS) ·  
Redis · Drizzle ORM

#### AI

elizaOS · Anthropic / OpenAI APIs · agent design ·  
RAG · LLM-as-judge

---

### SOFT SKILLS

- Senior IC who multiplies a team — mentoring, code review, technical direction
- Transparent delivery — live project dashboard, defensible estimates
- Multi-stream parallel work — solo or embedded in a team, the rhythm holds
- Cross-functional: DevOps + backend + AI in production, no silo
- Open-source operator — public reviews, work directly with upstream maintainers

---

### EDUCATION

2018 - 2021

**École de Management de Lyon**

Master's — IT Management

2014 - 2018

**Université Lumière Lyon 2**

Bachelor's — Computer Science

---

### LANGUAGES

French (native)

Spanish (native)

English (fluent)

---

**INTERESTS.** Side projects in open source: DCA automation across Solana / EVM, matchmaking bot, Claude Code tooling. Off-screen: cycling, climbing, slow cooking. I read more SRE postmortems than is reasonable.
